

FRITZ-Segel

[Optimist]

Yellow (up to 30 kg)

Designed and developed for the lightest sailors. The sail is perfect for beginners. The flat shape gives the young learners in all conditions easy control of their Optimists. The sail is easy to trim and helps the young guys to improve and learn the boat handling. The cloth is of excellent quality, made by Contender Europe.

Black (30-41 kg)

Perfect all-round sail for lakes. In addition to the flat entry, the 2.99oz PK Contender cloth grants a stabile leech for excellent pointing and good speed in flat waters.

Red (40-45 kg)

Perfect sail for a big variety of winds. The round entry of the sail provides fast acceleration and easy steering in choppy conditions. We decided to go for 3.05 RSQ Contender sailcloth. This material supports a nice twist and avoids too much return in the lower part of the sail.

Silver (from 45 kg)

This sail design creates a lot of power and is made for advanced sailors. The round entry and fuller shape of our „Silver“ model supports easy driving at a superior speed in all conditions. The construction of the 3.05 RSQ sailcloth helps loading up your boat and reduces pressure when necessary. As well this fabric avoids too much return in the lower part of the sail. The fuller shape is perfect for fast downwind runs.
